

Opuha Water Limited (OWL) Strategic Framework 2015-2018

Our Mission: Enabling Sustainable Growth through Responsible Land and Water Use	
<p>Our Values</p> <p>Do you have agreed values? (No we don't, yes we should)</p>	<p>Our Vision</p> <p>OWL is the water infrastructure organisation of choice in the OOP catchment - valued by shareholders and the community for its balanced leadership and best practice in: water infrastructure management; environmental management and water quality outcomes, and adoption of good land and water management practices.</p> <p>OWL will achieve this by carefully balancing its control and influence to work with shareholders and stakeholders to secure the long-term viability of productive farming in the OOP catchment.</p>

Strategic Priorities				
Effectively manage OWL's physical assets	Develop our scheme operation and management model and consider how IP and capability can be leveraged	Actively work to clarify and realise growth and reliability potential within the OOP catchments	Lead the adoption of best practice farm management practices to deliver environmental and water quality benefits	Actively participate and influence the development of the OOP Sub-Regional Plan from a platform of evidence-based contribution and knowledge

Statement of Success (2018)				
<p>OWL's investment in its physical assets is right-sized to its shareholder's reliability and volume requirements with adequate capacity to support the environmental outcomes desired.</p> <p>Water is delivered to the shareholder at a price that supports sustainable farm management.</p> <p>OWL has Capital Asset Management Plans in place that anticipate and plan for shareholders' medium term needs and which are communicated to shareholders with transparency of medium-term proposed investment.</p>	<p>OWL values its intellectual property and management capability and has resilience in its management model to mitigate risk of loss of institutional knowledge.</p> <p>OWL's management capability is right-sized and continues to represent excellent value for money to its shareholders.</p> <p>OWL has robust systems and processes that are best practice and which continue to respond to changes in OWL's operating context.</p> <p>OWL's capability is widely recognised, sought after and able to be applied to other organisations.</p>	<p>OWL (in collaboration with the Zone Committee, Runanga, ECan and other stakeholders) has agreement regarding opportunities for new water and water storage in the catchment including:</p> <ul style="list-style-type: none"> • Source(s) and volume(s) • Indications of affordability • Reliability implications for existing and new users • Storage options • Timing for realisation • In-scheme infrastructure requirements. <p>OWL acts on opportunities to collectivise with other water users where it makes strategic sense and is in the interests of its shareholders to do so.</p>	<p>All OWL shareholders understand the benefits and adopt Good Management Practice.</p> <p>OWL is acknowledged as having supported Good Management Practice gains by actively working with shareholders in sharing best practice.</p> <p>OWL can demonstrate to the Regulator and wider community how it and its shareholders are working to operate at a best practice level and in doing so achieving environmental and water quality benefits in the catchment.</p>	<p>The draft Sub-Regional Plan is widely supported and includes provisions that:</p> <ul style="list-style-type: none"> • Enable OWL and its shareholders to continue viable and sustainable farming activities; • Accommodate OWL's growth plans; • Provide opportunities and/or incentives for collectivisation to leverage infrastructure and capability;
